

Early Run of Month-End Reports, Effective August 13, 1998

At the request of users, a performance change in the batch cycle has been successfully implemented. This will allow month-end reports to be run on a weekday without delaying the Daily reports which will still be available to users by 7:00 a.m.

Implementation of this new process is scheduled to take affect Thursday, August 13, 1998, with the July month-end reports. July monthly reports will be available to users on Friday, instead of the following Monday.
